HIGH-DEDUCTIBLE EPO HEALTH PLAN

Lab & Radiology Services

In Office:

You can perform labs and x-rays if your office has the capability of doing so. However, if you have a draw station or x-ray services that are contracted out, the billing provider must be contracted with the Select Network for the services to be covered by the plan. If you send your patients out for these services, please refer your patient to go only to a contracted provider. Be sure to include the ICD-10 and a signature on your order.

The Select Network Includes the Following Providers:

Labs -

- Kern Medical Main Campus, Columbus, & Stockdale
- Foundation Laboratory
- PAL
- Quest Diagnostics

No prior authorization is required for most lab services. Coverage for lab services related to genetic testing has benefit limitations and will require prior approval from the Plan.

Radiology -

- Kern Medical Main Campus, Columbus, & Stockdale
- Kern Radiology
- Stockdale Radiology
- Truxtun Radiology

Prior authorization is required advanced radiology procedures such as CT Scan, MRI, and PET. Routine X-rays, ultrasound, and mammograms do not require authorization.
